

DIN EN 10371:2021-06 (E)

Metallic materials - Small punch test method

Contents		Page
European foreword		3
Introduction		4
1	Scope	5
2	Normative references	5
3	Terms and definitions	5
4	Symbols and designations	9
5	Test piece	12
5.1	General	12
5.2	Material sampling	14
6	Apparatus	14
6.1	Testing machine	14
6.2	Test environment	15
6.3	Applying and measuring force	15
6.4	Punch and specimen holder	15
6.5	Measuring displacement and/or deflection	17
6.6	Measuring test temperature	17
7	Small punch test	18
7.1	Principle	18
7.2	Test procedure	18
7.3	Characteristic parameters on the force-deflection curve $F(u)$	19
7.4	Test report	23
8	Small punch creep test	23
8.1	Principle	23
8.2	Specificities of apparatus for small punch creep testing	24
8.3	Test procedure	24
8.4	Characteristics of the deflection-time curve	25
8.5	Test report	26
Annex A(informative) Determining the compliance of a small punch test rig for displacement measurements		27
Annex B(informative) Procedure for temperature control and measurement during small punch testing		30
Annex C(informative) Estimation of ultimate tensile strength R_m from small punch testing		35
Annex D(informative) Estimation of proof strength $R_{p0,2}$ from small punch testing		39
Annex E(informative) Estimation of DBTT from small punch testing		40
Annex F (informative) Estimation of fracture toughness from small punch testing		43
Annex G(informative) Estimation of creep properties from small punch creep testing		46

Annex H(informative) Post-test examination of the test piece	50
Annex I(informative) Machine readable formats	56
Bibliography	57
