

DIN EN 10371:2021-06 (E)

Metallic materials - Small punch test method

Contents	Page
European foreword	3
Introduction	4
1 Scope	5
2 Normative references	5
3 Terms and definitions	5
4 Symbols and designations	9
5 Test piece	12
5.1 General	12
5.2 Material sampling	14
6 Apparatus	14
6.1 Testing machine	14
6.2 Test environment	15
6.3 Applying and measuring force	15
6.4 Punch and specimen holder	15
6.5 Measuring displacement and/or deflection	17
6.6 Measuring test temperature	17
7 Small punch test	18
7.1 Principle	18
7.2 Test procedure	18
7.3 Characteristic parameters on the force-deflection curve F(u)	19
7.4 Test report	23
8 Small punch creep test	23
8.1 Principle	23
8.2 Specificities of apparatus for small punch creep testing	24
8.3 Test procedure	24
8.4 Characteristics of the deflection-time curve	25
8.5 Test report	26
Annex A(informative) Determining the compliance of a small punch test rig for displacement measurements	27
Annex B(informative) Procedure for temperature control and measurement during small punch testing	30
Annex C(informative) Estimation of ultimate tensile strength R _m from small punch testing	35
Annex D(informative) Estimation of proof strength R _{p0,2} from small punch testing	39
Annex E(informative) Estimation of DBTT from small punch testing	40
Annex F (informative) Estimation of fracture toughness from small punch testing	43
Annex G(informative) Estimation of creep properties from small punch creep testing	46

Annex H(informative) Post-test examination of the test piece	50
Annex I(informative) Machine readable formats	56
Bibliography	57
