ISO 21583:2020 (E)

Firework displays — General guidance

Contents

Foreword

Introduction

- 1 Scope
- 2 Normative references
- 3 Terms and definitions
- 4 Types, safety distance and categories of fireworks displays
 - 4.1 Types of fireworks display
 - 4.2 Safety distance
 - 4.2.1 General
 - 4.2.2 Factors that should be considered for the determination of safety distances
 - 4.2.2.1 Performance characteristics of products
 - 4.2.2.2 Product installation methods
 - 4.2.2.3 Environmental conditions
 - 4.2.2.4 Other factors
 - 4.2.3 Determination of safety distance
 - 4.3 Categories of firework display
- 5 Operating technology of fireworks displays
 - 5.1 Personnel
 - 5.2 Site
 - 5.3 Operation plan
 - 5.4 Products, equipment and auxiliary materials and tools
 - 5.5 Installation
 - 5.5.1 Installation of articles
 - 5.5.2 Installation of mortars
 - 5.5.3 Loading, connecting and testing of shells
 - 5.6 Ignition
 - 5.7 Suspension or termination of displays
- 6 Safety management
- 7 Risk analysis
- Annex A (informative) Reference Data of Safety Distances
- Annex B (informative) Categories of Fireworks Displays
- Annex C (informative) Internal Distances and Examples of Installation of Shell Mortars
 - C.1 Steel tube rack fixing method
 - C.2 Frame fixing method
 - C.3 Net frame fixing method
 - C.4 Sandy soil fixing method
