ISO 22290:2020 (E)

Non-destructive testing — Infrared thermographic testing — General principles for thermoelastic stress measuring method

Contents

Foreword

Introduction

1 Scope

2 Normative references

3 Terms and definitions

4 Infrared thermographic testing personnel

5 Test Environment

5.1 Installation environment for the test equipment
5.2 Avoidance of disturbances

6 Equipment

6.1 Configuration
6.2 Infrared camera
6.3 Detection of temperature change by thermoelastic effect

7 Measuring method

7.1 Test object
7.2 Load condition
7.2.1 General load condition
7.2.2 Average value and amplitude of load
7.2.3 Load frequency
7.3 Imaging method
7.4 Calibration of stress value

8 Implementation and reporting of tests

8.1 Items described in the NDT procedures
8.2 Items described in the NDT instructions
8.3 Record of test conditions
8.4 Report

Page count: 9
