

ISO 22290:2020 (E)

Non-destructive testing — Infrared thermographic testing — General principles for thermoelastic stress measuring method

Contents

	Foreword
	Introduction
1	Scope
2	Normative references
3	Terms and definitions
4	Infrared thermographic testing personnel
5	Test Environment
5.1	Installation environment for the test equipment
5.2	Avoidance of disturbances
6	Equipment
6.1	Configuration
6.2	Infrared camera
6.3	Detection of temperature change by thermoelastic effect
7	Measuring method
7.1	Test object
7.2	Load condition
7.2.1	General load condition
7.2.2	Average value and amplitude of load
7.2.3	Load frequency
7.3	Imaging method
7.4	Calibration of stress value
8	Implementation and reporting of tests
8.1	Items described in the NDT procedures
8.2	Items described in the NDT instructions
8.3	Record of test conditions
8.4	Report
