Textiles_ - Tear properties of fabrics_ - Part_2: Determination of tear force of trouser-shaped test specimens (Single tear method)

Contents

Foreword	v
Introduction.....	vi
1 Scope	1
2 Normative references	1
3 Terms and definitions	2
4 Principle	2
5 Sampling	2
6 Apparatus.....	3
7 Atmosphere for conditioning and testing	3
8 Preparation of test specimens.....	3
9 Procedure	5
10 Calculation and expression of results	6
11 Test report.....	7
Annex A (informative) Suggested procedure for sampling.....	8
Annex B (informative) Example of pattern for cutting out test specimens from the laboratory sample.....	9
Annex C (informative) Sample calculation of tear force	10
Annex D (normative) Wide-width trouser test specimens	11
Bibliography.....	14
