ISO 23222:2020 (E)

Corrosion control engineering life cycle — Risk assessment

Contents

Foreword

1 Scope

2 Normative references

3 Terms and definitions

4 General principles

4.1 Objectives
4.2 Principles

5 Risk assessment procedure

5.1 General
5.2 Risk identification
5.3 Risk analysis
5.3.1 Objectives
5.3.2 Corrosion sources
5.3.3 Design
5.3.4 Research and development
5.3.5 Materials, technology, manufacturing, construction, storage and transportation, installation and commissioning, and repair
5.3.6 Acceptance inspection
5.3.7 Operation
5.3.8 Maintenance
5.3.9 Scrap and disposal
5.3.10 Documents and records
5.3.11 Resource management
5.3.12 Comprehensive assessment
5.4 Risk evaluation
5.4.1 Evaluation principle
5.4.2 Evaluation method
5.4.3 Risk assessment report

6 Quantitative analysis of risk

Annex A (informative) Corrosion control engineering life cycle risk assessment form

Annex B (informative) Quantitative analysis of risk
