| <b>Annex A (normative) Second derivative and “filtered” second derivative</b>                                   |                                                                                                                                | <b>17</b>   |
| <b>Annex B (normative) Calculation of the width of the fit window</b>                                           |                                                                                                                                | <b>18</b>   |
| <b>Annex C (normative) Evaluation of the inverse best-fit parabola on the “bell-shaped curve”</b>               |                                                                                                                                | <b>19</b>   |
| <b>Annex D (normative) Application/Measurement of grid —<br/>Evaluation with magnifying glass or microscope</b> |                                                                                                                                | <b>21</b>   |
| <b>Annex E (informative) Tables of experimental data for validation of calculation programme</b>                |                                                                                                                                | <b>22</b>   |
| <b>Annex F (normative) Representation and mathematical description of FLC</b>                                   |                                                                                                                                | <b>23</b>   |
| <b>Annex G (informative) Examples of critical section line data</b>                                             |                                                                                                                                | <b>24</b>   |
| <b>Annex H (normative) Flowchart from measured strain distributions to FLC values</b>                           |                                                                                                                                | <b>25</b>   |
| <b>Bibliography</b>                                                                                             |                                                                                                                                | <b>27</b>   |
