ISO 22167:2021 (E)

Solid recovered fuels — Determination of content of volatile matter

Contents

Foreword

Introduction

1 Scope

2 Normative references

3 Terms and definitions

4 Principle

5 Apparatus

- 5.1 Furnace
- 5.2 Thermocouple
- 5.3 Crucible
- 5.4 Crucible stand
- 5.5 Balance

6 Sampling and sample preparation

7 Procedure

- 7.1 Use of automatic equipment
- 7.2 Number of determinations
- 7.3 Furnace temperature checking
- 7.4 Volatile matter determination

8 Calculation

- 8.1 Case A – without removed ash contributors
- 8.2 Case B – with removed ash contributors

9 Precision

- 9.1 Repeatability limit
- 9.2 Reproducibility limit

10 Test report

Annex A (informative) Interlaboratory test results

Annex B (informative) Environmental aspects
