ISO 23692:2021 (E)

Microbeam analysis — Electron probe microanalysis — Quantitative analysis of Mn dendritic segregation in continuously cast steel product

Contents

Foreword

Introduction

1 Scope

2 Normative references

3 Terms and definitions

4 Principle

5 Selection of reference material

6 Sampling and specimen preparation

6.1 Sampling
6.2 Specimen preparation

7 Calibration of the instrument

8 Procedure

8.1 Prepare the instrument
8.2 Set up the experiment parameters
8.3 Perform the analysis
8.4 Process the data

9 Uncertainty

10 Report

Annex A (informative) Example of quantitative mapping analysis of dendritic segregation

Annex B (informative) Example of quantitative line analysis of dendritic segregation
