ISO 6249:2021 (E)

Petroleum products — Determination of thermal oxidation stability of gas turbine fuels

Contents

Foreword

1 Scope

2 Normative references

3 Terms and definitions

3.1 Generic terms
3.2 Rating procedure terms

4 Principle

5 Reagents and materials

6 Apparatus

7 Samples and sampling procedures

8 Preparation of apparatus

8.1 Cleaning and assembly of heater test section
8.2 Cleaning and assembly of the remainder of the test components

9 Calibration and standardization

10 Procedure

10.1 Preparation of fuel test sample
10.2 Final assembly
10.3 Power up and pressurization
10.4 Start up
10.5 Test
10.6 Heater tube profile
10.7 Shutdown
10.8 Disassembly

11 Heater tube deposit rating

12 Precision

13 Test report

Annex A (normative) Apparatus

A.1 Test instrument
A.2 General description
A.3 Fuel system
A.4 Control system for heating and temperature
A.5 Cooling system
A.6 Pressurization
A.7 Differential-pressure measurement
A.8 Calibration of the differential-pressure transducer cell
A.9 Thermocouple calibration
A.10 Fuel aeration system
A.11 Leakage check for filter by-pass valve (models 202, 203 and 215)
A.12 Fuel-metering pump check (gear pumps only)

A.13 Flow rate check

Annex B (normative) Visual rating of used heater tubes

B.1 General
B.2 Principle
B.3 Apparatus
B.4 Test heater tube
B.5 Standard operating conditions
B.6 Standardization procedure
B.6.1 Colour standard
B.6.2 Rating technique
B.7 Procedure
B.7.1 Set-up
B.7.2 Evaluation
B.8 Test report

Annex C (normative) Interferometric method

C.1 General
C.2 Principle
C.3 Reagents and materials
C.4 Apparatus
C.5 Apparatus preparation
C.6 Baseline calibration
C.7 Apparatus verification
C.8 Heater tube inspection
C.9 Procedure
C.10 Expression of result

Annex D (normative) Ellipsometric method

D.1 General
D.2 Principle
D.3 Reagents and materials
D.4 Apparatus
D.5 Apparatus preparation
D.6 Apparatus verification
D.7 Heater tube inspection
D.8 Procedure

Annex E (normative) Multi-wavelength ellipsometric method

E.1 General
E.2 Principle
E.3 Reagents and materials
E.4 Apparatus
E.5 Apparatus preparation
E.6 Apparatus verification
E.7 Heater tube inspection
E.8 Procedure

Annex F (informative) Calibrator and thermocouple maintenance

F.1 Calibration and metal replacement
F.2 Thermocouple replacement and position adjustment
F.3 Heater-tube temperature profile
