DIN 19268:2021-10 (E)

pH-measurement - pH-measurement of aqueous solutions with pH measuring chains with pH glass electrodes and evaluation of measurement uncertainty

Contents

Page

Foreword ... 4

1 Scope ... 5

2 Normative references ... 5

3 Terms and definitions ... 5

4 Principles ... 6

5 pH measurement method ... 8
5.1 Sampling ... 8
5.2 Apparatus and auxiliary equipment ... 8
5.2.1 General ... 8
5.2.2 Combination electrode ... 8
5.2.3 pH meter ... 9
5.2.4 Reference buffer solution for calibration ... 9
5.3 Calibration ... 10
5.3.1 General ... 10
5.3.2 Two-point calibration method ... 10
5.3.3 Single-point calibration method ... 10
5.3.4 Bracketing method ... 10
5.3.5 Multipoint calibration method ... 10
5.3.6 Adjustment ... 11
5.4 Measurement ... 11
5.4.1 General ... 11
5.4.2 pH measuring device ... 11
5.4.3 Calibration and measurement procedure ... 12
5.4.4 Statement of result and expanded uncertainty ... 13
5.4.5 Factors that increase uncertainty of measurement ... 13
5.4.6 Guideline values for standard uncertainties of measurement ... 17

Annex A (normative) **Calculating the expanded uncertainty** U ... 18

Annex B (informative) **Protocol for a pH measurement as in DIN 19268** ... 22

Bibliography ... 24

Figures

Figure 1 — Components of measurement uncertainty ... 7

Figure 2 — Schematic representation of a pH measuring device ... 8

Figure 3 — Example of a pH characteristic curve at 25 °C ... 15

Tables

Table 1 — Guideline values **12**

Table 2 — Quantities and units for calculating Equation (1) to Equation (13) **14**

Table A.1 — Equations for calculating the expanded uncertainty **18**

Table A.2 — Calculating an example with the expanded uncertainty $U\ (k = 2) = 0{,}3$ **19**

Table A.3 — Calculating an example with the expanded uncertainty $U\ (k = 2) = 0{,}15$ **20**

Table A.4 — Calculating an example with the expanded uncertainty $U\ (k = 2) = 0{,}03$ **21**
