ISO 23216:2021 (E)

Carbon based films — Determination of optical properties of amorphous carbon films by spectroscopic ellipsometry

Contents

Foreword

Introduction

1 Scope

2 Normative references

3 Terms and definitions

4 Test specimen preparation

5 Apparatus

6 Procedure

- 6.1 Treatment of specimen before test
- 6.2 Preparation for test
- 6.3 Testing conditions for test
- 6.4 Optical model for analysis
- 6.5 Number of test repeats

7 Classification of test results

8 Test report

Annex A (normative) Classification method for amorphous carbon films by optical properties
