ISO/TS 23650:2021-10 (E)

Nanotechnologies - Evaluation of the antimicrobial performance of textiles containing manufactured nanomaterials

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Termsanddefinitions 1

4 Symbols and abbreviated terms 2

5 Characteristics of metal or metal oxide nanomaterials in TCMNMs 3
5.1 General 3
5.2 Physicochemical characteristics of metal or metal oxide nanomaterials 3
5.3 Characterization methods 4

6 Measurement of the released metal or metal oxide nanomaterials 4
6.1 Principle 4
6.2 Human perspiration solution preparation 4
6.2.1 General 4
6.2.2 Measurement method 4
6.3 Washing procedure 5

7 Determination of antimicrobial activities of TCMNMs 5
7.1 Principle 5
7.2 Antibacterial activity 5
7.3 Antifungal activity 5
7.4 Anti-odour property 6

8 Test report 6

Annex A (informative) Physical characterization techniques of nanomaterials in TCMNMs 9

Annex B (informative) Chemical characterization of nanomaterials in TCMNMs 10

Annex C (informative) Determination of antibacterial, antifungal, and anti-odour activity of TCMNMs 11

Bibliography 13
