Page

Foreword ... 3
1 Scope ... 4
2 Normative references ... 4
3 Terms and definitions ... 4
4 Verification criteria ... 4
4.1 General ... 4
4.2 Machine frame ... 4
4.3 Measuring device ... 5
4.3.1 Force measuring device ... 5
4.3.2 Extensometer ... 5
4.4 Spring carrying devices ... 5
4.4.1 Draw-hooks ... 5
4.4.2 Loading platens ... 5
4.4.3 Roller carriage ... 6
5 Information on basic conditions for verification and calibration ... 6
5.1 Calibration and verification of the force measuring device ... 6
5.2 Testing the influence of eccentric clamping and eccentric force progression ... 7

Figures

Figure 1 — Relationship between test force and spring deflection as a function of spring stiffnes ... 7
Figure 2 — Causes of eccentric test forces ... 7
Figure 3 — Verifying the influence of eccentricity on force measurement using the example of a helical spring with plane-parallel ends ... 8

Tables

Table 1 — Tolerance on parallelism of unloaded loading platens ... 6
