## Materials testing machines - Calibration of static torque measuring devices

---

<b>Contents</b>		<b>Page</b>
Foreword .....		4
1 Scope .....		5
2 Normative references .....		5
3 Terms and definitions.....		5
4 Symbols .....		5
5 Characteristics of the torque measuring device.....		7
5.1 Description and marking of the torque measuring device .....		7
5.2 Torque application .....		7
5.3 Measurement of the torque by deformation .....		7
6 Calibration of the torque measuring device .....		7
6.1 General .....		7
6.1.1 Requirements .....		7
6.1.2 Overload check.....		8
6.2 Resolution of the display unit .....		8
6.2.1 Scale indication .....		8
6.2.2 Digital indication .....		8
6.2.3 Indication fluctuation .....		8
6.2.4 Resolution and its unit.....		9
6.2.5 Lower limit of measurement range .....		9
6.3 Preparation for calibration.....		9
6.3.1 Display unit .....		9
6.3.2 Temperature equalization .....		9
6.3.3 Transducer zero value $I_s$ .....		9
6.3.4 Mounting direction, transducer connection.....		9
6.4 Calibration procedure .....		9
6.4.1 Scope of the calibration and procedure .....		9
6.4.2 Preloading .....		10
6.4.3 Mounting position .....		10
6.4.4 Number of measurement series and torque steps .....		10
6.4.5 Loading conditions .....		12
6.4.6 Displayed value corrected for the zero value $X_j (M_K)$ .....		12
6.4.7 Evaluation of the torque measuring device .....		12
6.4.8 Short-term creep .....		15
7 Classification of the torque measuring device.....		15
7.1 General .....		15
7.2 Classification principle.....		16
7.3 Lower limit of the measurement range and classification criteria .....		16
7.3.1 Lower limit of measurement range .....		16
7.3.2 Classification criteria .....		16
7.4 Calibration certificate and recalibration.....		17
7.4.1 Calibration certificate .....		17
7.4.2 Recalibration .....		18
8 Designation .....		18

<b>Annex A (normative) Application of calibrated torque measuring devices .....</b>	<b>19</b>
<b>Annex B (normative) Recommended dimensions for torque transducers, including couplings for their adaptation to torque calibration machines.....</b>	<b>20</b>
<b>Annex C (informative) Determination of the relative expanded measurement uncertainty <math>W</math> for the calibration of torque measuring devices.....</b>	<b>21</b>
<b>C.1 General.....</b>	<b>21</b>
<b>C.2 Determination of the measurement uncertainty of the fitted calibration result for the calibration of torque measuring devices.....</b>	<b>21</b>
<b>C.2.1 Model.....</b>	<b>21</b>
<b>C.2.2 Measurement uncertainty budget .....</b>	<b>22</b>
<b>Annex D (informative) Calibration procedure .....</b>	<b>26</b>
<b>Bibliography .....</b>	<b>27</b>

## Figures

<b>Figure B.1 — Adaptation dimensions on a torque transducer with cylindrical shaft ends .....</b>	<b>20</b>
<b>Figure D.1 — Example of preloadings and measurement series for classes 0,05 and 0,1.....</b>	<b>26</b>
<b>Figure D.2 — Example of preloadings and measurement series of square drive transducers for classes 0,2 and 0,5 .....</b>	<b>26</b>
<b>Figure D.3 — Example of preloadings and measurement series of square drive transducers for classes 1 to 5.....</b>	<b>26</b>

## Tables

<b>Table 1 — Symbols, units and designation .....</b>	<b>5</b>
<b>Table 2 — Number of measurement series required.....</b>	<b>11</b>
<b>Table 3 — Classification characteristics of the torque measuring devices.....</b>	<b>16</b>
<b>Table B.1 — Recommended dimensions for cylindrical shaft ends of a torque transducer.....</b>	<b>20</b>
<b>Table C.1 — Distribution functions for the calculation of the relative standard deviations for the parameters calculated from the spans determined empirically.....</b>	<b>23</b>
<b>Table C.2 — Example of the tabular calculation of the relative standard measurement uncertainty <math>w</math> for torque measuring devices for static torques .....</b>	<b>25</b>
