ISO 24656:2022-05 (E)

Cathodic protection of offshore wind structures

Contents

Page

Foreword vi

Introduction vii

1 Scope 1

2 Normative references 1

3 Termsanddefinitions 1

4 Symbols and abbreviations 5
4.1 Symbols 5
4.2 Abbreviations 7

5 Competence of personnel 8

6 Structural considerations 9
6.1 Structures to be protected 9
6.2 Materials 10
6.3 Corrosion protection strategy 10

7 Cathodic protection criteria 15
7.1 Temporary protection 15
7.2 Steel structures 16
7.3 Reinforced concrete structures 17

8 Cathodic protection design 17
8.1 Objectives 17
8.2 Design considerations 18
8.2.1 General 18
8.2.2 External cathodic protection 19
8.2.3 Internal cathodic protection 19
8.3 CP Design life 20
8.4 Surface area considerations 20
8.4.1 General 20
8.4.2 Structure subdivision 20
8.5 Environmental factors 21
8.5.1 General 21
8.5.2 Seawater flow velocity 21
8.5.3 Electrolyte resistivity 22
8.5.4 Seawater temperature 22
8.5.5 Calcareous deposits 22
8.6 Protection current demand 23
8.6.1 General 23
8.6.2 Calculation of current demand, external surfaces 23
8.6.3 Calculation of current demand, internal surfaces 26
8.7 Electrical continuity and continuity bonds 26
8.8 Current drains and interactions 27
8.9 Installation considerations during design 27

9 Galvanic anode systems 28
9.1 General 28

9.2 Anode current availability 28
9.3 Galvanic anode alloys 28
9.4 Anode selection 29
9.5 Anode requirements 30
9.6 Anode distribution 31

10 Impressed current systems 32
10.1 General 32
10.2 Design considerations 33
10.2.1 General 33
10.2.2 Resilience of impressed current CP system by design 33
10.2.3 Current requirement of impressed current CP system 34
10.2.4 Impressed current CP system components 34
10.2.5 DC power source 34
10.2.6 Impressed current anodes 36
10.2.7 Reference electrodes 37
10.2.8 Dielectric shields 37
10.3 Installation of impressed current CP systems 38
10.4 Hybrid systems and temporary power for impressed current systems 39
10.5 Continuity bonds 39

11 Cable systems 39
11.1 General 39
11.2 Cathodic protection DC cables 40
11.3 Inter-array and export AC cables 41

12 Commissioning and surveys 43
12.1 Objectives 43
12.2 Galvanic anode systems 43
12.2.1 General 43
12.2.2 Detailed external surveys 44
12.2.3 Detailed internal surveys 44
12.3 Permanent CP monitoring systems 45
12.4 Impressed current systems 45

13 CP surveying and monitoring 46
13.1 Objectives 46
13.2 General considerations 46
13.3 Reference electrodes 48
13.4 Frequency of survey and monitoring 48

14 Retrofitcathodicprotectionsystems 49
14.1 General considerations 49
14.2 Survey before retrofit 49
14.3 Retrofit for inadequate protection 50
14.4 Retrofit for structure life extension 50
14.5 All retrofits 51
14.6 Equipment considerations 52

15 Documentation 53
15.1 General 53
15.2 Design report 53
15.2.1 General 53
15.3 Material specification requirements 55
15.3.1 General 55
15.3.2 Galvanic anodes 55
15.3.3 Impressed current CP materials 56
15.4 Installation drawings and specifications 59
15.5 As-built installation and commissioning report requirements 59
15.6 Operation and maintenance requirements 60

16 Safety and cathodic protection 60
16.1 Objectives 60
16.2 Physical obstructions 61
16.3 Protection against electric shock 61
16.4 Gas evolution 61
16.4.1 Hydrogen evolution 61
16.4.2 Chlorine evolution 62

Annex A (informative) Environmental checklist 63

Annex B (normative)Methodofusingmetoceandatatocalculatemarked-upseawaterflow velocity 65

Annex C (informative) Guidance on cathodic protection current density requirement for cathodic protection of wind offshore structures 78

Annex D (informative) Coatings and coating breakdown for CP design 86

Annex E (normative) Anode resistance and life calculation 90

Annex F (normative) Calculation of voltage drop down connection cables 97

Annex G (normative) Typical electrochemical characteristics for commonly used impressed current anodes 99

Annex H (informative) Permanent monitoring system design process 101

Annex I (informative) Cathodic protection modelling 105
