DIN EN ISO 16808:2022-08 (E)

Metallic materials - Sheet and strip - Determination of biaxial stress-strain curve by means of bulge test with optical measuring systems (ISO 16808:2022)

Contents

Page

European foreword 3

Foreword 4

1 Scope 5

2 Normative references 5

3 Termsanddefinitions 5

4 Symbols and abbreviated terms 5

5 Principle 6

6 Test equipment 7

7 Optical measurement system 9

8 Test piece 10
8.1 General 10
8.2 Application of grid 10
8.2.1 Type of grid 10
8.2.2 Grid application 10

9 Procedure 10

10 Evaluation methods for the determination of the curvature and strains at the pole 11

11 Calculation of biaxial stress-strain curves 12

12 Test report 13

Annex A (informative) Test procedure for a quality check of the optical measurement system 15

Annex B (informative) Computation of the curvature on the basis of a response surface 18

Annex C (informative) Determination of the equi-biaxial stress point of the yield locus and the hardening curve 20
