DIN EN ISO 16539:2022-08 (E)

Corrosion of metals and alloys - Accelerated cyclic corrosion tests with exposure to synthetic ocean water salt-deposition process - „Dry" and „wet" conditions at constant absolute humidity (ISO 16539:2013)

European foreword ... **3**

Foreword ... **4**

Introduction ... **5**

1 Scope ... **6**

2 Normative references ... **6**

3 Test solution ... **7**
3.1 Preparation of the mixed salt solution ... 7
3.2 pH adjustment ... 7
3.3 Preparation of the test solution ... 7

4 Apparatus ... **8**
4.1 Component protection ... 8
4.2 Exposure cabinet ... 8
4.3 Salt deposition device ... 8
4.4 Temperature and humidity control device ... 8
4.5 Rinse treatment of specimens ... 8
4.6 Types of apparatus ... 8

5 Test specimens ... **9**

6 Salt deposition measurement method ... **9**

7 Arrangement of the test specimens ... **9**

8 Operating conditions and procedure ... **9**

9 Treatment of specimens after test ... **14**

10 Continuity of tests ... **14**

11 Duration of tests ... **14**

12 Evaluation of results ... **14**

13 Test report ... **14**

Annex A (informative) **Combined cyclic test instrument with salt deposition unit (two cabinets)** ... **16**

Annex B (informative) **Combined cyclic test instrument with salt deposition unit (one cabinet)** ... **17**

Annex C (informative) **Salt deposition method by manual spraying** ... **18**

Annex D (informative) **Recommended periods of testing** ... **20**

Annex E (informative) **Methods for evaluation of corrosivity of test** ... **22**

Bibliography ... **24**
