## Solid recovered fuels - Determination of self-heating - Part 2: Basket heating tests

---

| <b>Contents</b>       |  | <b>Page</b> |
|-----------------------|--|-------------|
| Foreword .....        |  | iv          |
| Introduction .....    |  | v           |
| 1                     | Scope .....  | 1           |
| 2                     | Normative references .....   | 1           |
| 3                     | Terms and definitions .....  | 1           |
| 4                     | Symbols .....  | 2           |
| 5                     | Basket heating tests .....   | 3           |
| 6                     | Tests for product classification .....   | 4           |
| 6.1                   | UN classification .....  | 4           |
| 6.1.1                 | General .....  | 4           |
| 6.1.2                 | Test method for self-heating substances - MTC Test N.4 .....                                     | 4           |
| 6.1.3                 | Classification criteria -- GHS .....   | 4           |
| 6.2                   | Classification criteria -- IMO .....   | 5           |
| 6.3                   | Applicability of MTC Test N.4 for solid recovered fuels .....                                    | 5           |
| 7                     | Tests for determination of reaction kinetics .....   | 6           |
| 7.1                   | General .....  | 6           |
| 7.2                   | Isoperibolic test methods .....  | 6           |
| 7.2.1                 | General .....  | 6           |
| 7.2.2                 | Test procedure .....   | 6           |
| 7.2.3                 | Determination of reaction kinetics .....   | 7           |
| 7.2.4                 | Applicability for solid recovered fuels .....  | 7           |
| 7.3                   | Crossing-point method .....  | 8           |
| 7.3.1                 | General .....  | 8           |
| 7.3.2                 | Test procedure .....   | 8           |
| 7.3.3                 | Determination of reaction kinetics .....   | 9           |
| 7.3.4                 | Applicability for solid recovered fuels .....  | 9           |
| 7.4                   | Adiabatic hot storage tests .....  | 10          |
| 7.4.1                 | General .....  | 10          |
| 7.4.2                 | Test procedure .....   | 10          |
| 7.4.3                 | Determination of reaction kinetics .....   | 11          |
| 7.4.4                 | Applicability for solid recovered fuels .....  | 12          |
| 8                     | Sample handling .....  | 12          |
| 8.1                   | General .....  | 12          |
| 8.2                   | Sampling .....   | 13          |
| 8.3                   | Sample transport and storage .....   | 13          |
| 8.4                   | Sample preparation .....   | 13          |
| 8.5                   | Sample disposal .....  | 13          |
| 9                     | Test report .....  | 13          |
| Annex A (informative) | Self-ignition behaviour of selected materials suitable to be used as solid recovered fuels ..... | 15          |

|  |           |
|--|-----------|
| <b>Annex B (informative) Example of calculating kinetic parameters from crossing point method tests</b><br>..... | <b>22</b> |
| <b>Annex C (normative) Use of data for calculations of critical conditions in storage</b> .....                  | <b>25</b> |
| <b>Bibliography</b> .....  | <b>30</b> |
