

DIN EN ISO 9227:2023-03 (E)

Corrosion tests in artificial atmospheres - Salt spray tests (ISO 9227:2022)

Contents	Page
European foreword	4
Foreword	5
Introduction	6
1 Scope	7
2 Normative references	7
3 Terms and definitions	8
4 Principle	8
5 Test solutions	8
5.1 Preparation of the sodium chloride solution	8
5.2 Preparation of each test solution with pH adjustment	9
5.2.1 pH of the salt solution	9
5.2.2 Neutral salt spray test	9
5.2.3 Acetic acid salt spray test	9
5.2.4 Copper-accelerated acetic acid salt spray test	10
5.3 Filtration	10
6 Apparatus	10
6.1 Component protection	10
6.2 Spray cabinet	10
6.3 Heater and temperature control	10
6.4 Spraying device	10
6.5 Collecting devices	11
6.6 Re-use	12
7 Method for evaluating cabinet corrosivity	12
7.1 General	12
7.2 Reference specimens	12
7.3 Arrangement of the reference specimens	13
7.4 Determination of mass loss (mass per area)	13
7.5 Satisfactory performance of cabinet	14
8 Test specimens	14
9 Arrangement of the test specimens	14
10 Operating conditions	15
11 Duration of tests	15
12 Treatment of test specimens after test	16
12.1 General	16
12.2 Non-organic coated test specimens: metallic and/or inorganic coated	16
12.3 Organic coated test specimens	16
12.3.1 Scribed organic coated test specimens	16
12.3.2 Organic coated but not scribed test specimens	16
13 Evaluation of results	17
14 Test report	17
Annex A (informative) Example schematic diagram of one possible design of spray cabinet with means for optional treating fog exhaust and drain	19

Annex B (informative) Complementary method for evaluating cabinet corrosivity using zinc reference specimens	21
Annex C (normative) Preparation of specimens with organic coatings for testing	23
Annex D (informative) Required supplementary information for testing test specimens with organic coatings	24
Annex E (informative) Examples of arrangement of the collecting devices	25
Annex F (informative) Interlaboratory comparison for reference specimens	27
Bibliography	29
