|-----------------------|--|-------------|
| Foreword .....        |  | iv          |
| Introduction .....    |  | v           |
| 1                     | Scope .....  | 1           |
| 2                     | Normative references .....   | 1           |
| 3                     | Terms and definitions .....  | 1           |
| 4                     | Test requirements .....  | 2           |
| 4.1                   | Sample .....   | 2           |
| 4.2                   | Measuring instrument .....   | 2           |
| 4.3                   | Environment .....  | 2           |
| 5                     | Number concentration and volume concentration .....  | 2           |
| 5.1                   | Difference of impression between number-based and volume-based size distributions .....                                      | 2           |
| 5.2                   | Conversion between number dimension amount and volume dimension amount .....   | 4           |
| 5.3                   | Evaluation of fine bubble effect .....   | 5           |
| 6                     | Evaluation .....   | 5           |
| 6.1                   | Sampling and sample preparation .....  | 5           |
| 6.2                   | Procedure of the combined use of number-based size analysis and volume-based size analysis by laser diffraction method ..... | 5           |
| 7                     | Test report .....  | 6           |
| Annex A (informative) | Examples of combined use of number-based size analysis and volume-based size analysis by laser diffraction method .....      | 7           |
| Bibliography .....    |  | 11          |
