ISO 4905:2023-02 (E)

Corrosion of metals and alloys - Electrochemical test methods for high-temperature corrosion testing of metallic materials in molten salts

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Termsanddefinitions 1

4 Apparatus 1
4.1 General 1
4.2 Heating unit or furnace 1
4.3 Gas feeding unit 2
4.4 Electrochemical measurement unit 3
4.5 Electrochemical cell 4
4.6 Molten salt 6
4.7 Test atmosphere 6

5 Procedure 6
5.1 Preparation and placement of the electrochemical cell 6
5.2 Test environment with flowing reactive gas 7
5.3 Electrochemical measurement 7

6 Test report 9
6.1 General 9
6.2 Reports with potentiodynamic polarization measurements 10
6.3 Reports with EIS measurements 10

Annex A (informative) Examples of molten salts and test temperatures in high-temperature molten salts 11

Annex B (informative) Example of reference electrode for electrochemical measurement 12

Bibliography 13
