DIN EN ISO 19749:2023-07 (E)

Nanotechnologies - Measurements of particle size and shape distributions by scanning electron microscopy (ISO 19749:2021)

Contents

Page

European foreword ... **4**

Foreword ... **5**

Introduction ... **6**

1 Scope ... **7**

2 Normative references ... **7**

3 Terms and definitions ... **8**
3.1 General terms ... 8
3.2 Core terms: image analysis ... 10
3.3 Core terms: statistical symbols and definitions ... 10
3.4 Core terms: measurands and descriptors ... 12
3.5 Core terms: metrology ... 14
3.6 Core terms: scanning electron microscopy ... 16

4 General principles ... **17**
4.1 SEM imaging ... 17
4.2 SEM image-based particle size measurements ... 18
4.3 SEM image-based particle shape measurements ... 19

5 Sample preparation ... **19**
5.1 Sample preparation fundamental information ... 19
5.2 General recommendations ... 20
5.3 Ensuring good sampling of powder or dispersion-in-liquid raw materials ... 20
5.3.1 Powders ... 20
5.3.2 Nanoparticle dispersions in liquids ... 21
5.4 Ensuring representative dispersion ... 21
5.5 Nanoparticle deposition on a substrate ... 21
5.5.1 General ... 21
5.5.2 Nanoparticle deposition on wafers and chips of silicon or other materials ... 22
5.5.3 Nanoparticle deposition on TEM grids ... 23
5.6 Number of samples to be prepared ... 24
5.7 Number of particles to be measured for particle size determination ... 24
5.8 Number of particles to be measured for particle shape determination ... 25

6 Qualification of the SEM for nanoparticle measurements ... **25**

7 Image acquisition ... **25**
7.1 General ... 25
7.2 Setting suitable image magnification and pixel resolution ... 30

8 Particle analysis ... **31**
8.1 Particle analysis fundamental information ... 31
8.2 Individual particle analysis ... 31
8.3 Automated particle analysis ... 31
8.4 Automated particle analysis procedure example ... 32

9 Data analysis ... **33**
9.1 General ... 33
9.2 Raw data screening: detecting touching particles, artefacts and contaminants ... 33
9.3 Fitting models to data ... 33

9.4 Assessment of measurement uncertainty 34
9.4.1 General 34
9.4.2 Example: Measurement uncertainty for particle size measurements 34
9.4.3 Bivariate analysis 35
10 Reporting the results **35**
Annex A (normative) **Qualification of the SEM for nanoparticle measurements** **37**
Annex B (informative) **Cross-sectional titanium dioxide samples preparation** **42**
Annex C (informative) **Case study on well-dispersed 60 nm size silicon dioxide nanoparticles** **44**
Annex D (informative) **Case study on 40 nm size titanium dioxide nanoparticles** **52**
Annex E (informative) **Example for extracting particle size results of SEM-based nanoparticle measurements using ImageJ** **61**
Annex F (informative) **Effects of some image acquisition parameters and thresholding methods on SEM particle size measurements** **63**
Annex G (informative) **Example for reporting results of SEM-based nanoparticle measurements** **67**
Bibliography **77**
