

ISO/TS 4240-1:2023-03 (E)

Fine bubble technology - Environmental applications - Part 1: Inspection method using online particle counter in dissolved air flotation (DAF) plant

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Principle	2
5	BVC measurement technique	2
5.1	Test equipment	2
5.2	Procedure	3
6	Bubble bed depth measurement technique	4
6.1	Test equipment	4
6.2	Procedure	5
7	Advantages and limitations	6
7.1	Advantages	6
7.2	Limitations	7
Annex A (informative) Measurement of bubble size and size distribution by PCM		8
Annex B (informative) Height from the water surface to the bubble bed depth		9
Annex C (informative) Comparison of the results of bubble bed depth obtained by using the naked eye and by using a particle counting method		10
Annex D (informative) Measuring bubble bed depth of DAF process in full scale		12
Annex E (informative) Change of bubble bed depth at different operating conditions		14
Annex F (informative) Contribution of particles and bubbles in particle count measurements		15
Annex G (informative) Effect of sampling tube length		17
Bibliography		18
