ISO 19337:2023-05 (E)

Nanotechnologies - Characteristics of working suspensions of nano-objects for in vitro assays to evaluate inherent nano-object toxicity

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Termsanddefinitions 1

4 Abbreviated terms 2

5 Characteristics and measurement methods 2
5.1 General 2
5.2 Stability of working suspensions 3
5.2.1 General 3
5.2.2 Representative size change of secondary particles of nano-objects 3
5.2.3 Concentration change of nano-objects 3
5.3 Concentration of metal ions 3
5.4 Concentration of culture medium components 4
5.4.1 General 4
5.4.2 Proteins 4
5.4.3 Calcium 4
5.5 Contamination 4

6 Reporting 5
6.1 General 5
6.2 Name of nano-objects and manufacturing information 5
6.3 Composition and metallic elements included in the nano-object sample 5
6.4 Culture medium and serum 5
6.5 Measurement results 5
6.6 Optional methods 6

Annex A (normative) Flow of measurements 7

Annex B (informative) Measurement and evaluation of stability 8

Annex C (informative) Measurement of metal ions 9

Annex D (informative) Measurement of culture medium components 11

Annex E (informative) Contamination 12

Bibliography 13
