

ISO 14595:2023-06 (E)

Microbeam analysis - Electron probe microanalysis - Guidelines for the specification of certified reference materials (CRMs)

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Preparation of the research material	2
4.1	Selection of material	2
4.2	Preliminary inspection of the material	2
5	Heterogeneity of material	2
5.1	Sample preparation	2
5.2	Sample size	3
5.3	Test conditions	3
5.4	Test procedure	4
5.5	Statistical evaluation of data	4
5.6	Criteria for certification	9
6	Stability of the research material	9
7	Determination of the chemical composition of CRMs	9
7.1	Classification of CRMs	9
7.2	Determination of classification of CRMs	9
7.3	Selection of analytical method	10
7.4	CRM material tested by EPMA only	10
8	CRM specimen preparation, packaging, transportation, and storage	10
8.1	Preparation of CRM specimen	10
8.2	Packaging	10
8.3	Storage	10
8.4	Repolishing and recoating of CRMs	10
9	CRM certificate	11
9.1	Classification of CRM	11
9.2	of the certificate	11
Annex A (informative) Spreadsheet instructions for the statistical evaluation of heterogeneity data		12
Annex B (normative) Suggested classification of CRMs for EPMA		15
Annex C (informative) Example of a certificate for EPMA CRMs		16
Bibliography		17
