ISO 24448:2023-07 (E)

Fine ceramics (advanced ceramics, advanced technical ceramics) - LE D light source for testing semiconducting photocatalytic materials used under in door lighting environment

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Termsanddefinitions 1

4 Light sources 2

5 Illuminance meters 4

6 Measurement and use conditions 4

7 Test report 4

Annex A (informative) Relationship between photocatalytic performance and correlated colour temperature of light source and indoor lighting environments 5

Annex B (informative) Difference in characteristics of white LED lamps in the same product sold in the market 7

Annex C (informative) Example of an irradiation box with a large uniform illuminance on an irradiation surface 8

Annex D (informative) Characteristics of illuminance meters 11
