

ISO/TS 24672:2023-11 (E)

Nanotechnologies - Guidance on the measurement of nanoparticle number concentration

Contents		Page
Foreword		v
Introduction		vi
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Abbreviated terms	4
5	Overview	5
5.1	General	5
5.2	Comparison of different techniques	5
5.3	Considerations when selecting a technique	8
5.3.1	General	8
5.3.2	Type of particles	8
5.3.3	Number concentration range	9
5.3.4	Accuracy and precision	9
5.3.5	Other factors	10
5.4	Unit for nanoparticle number concentration	10
6	Ensemble techniques	11
6.1	Differential centrifugal sedimentation	11
6.1.1	General	11
6.1.2	Sample specifications	12
6.1.3	Technical aspects	12
6.1.4	Sources of uncertainty and challenges	14
6.1.5	Outlook	15
6.2	Multi-angle dynamic light scattering	15
6.2.1	General	15
6.2.2	Sample specifications	15
6.2.3	Technical aspects	16
6.2.4	Sources of uncertainty and challenges	17
6.2.5	Outlook	17
6.3	Small-angle X-ray scattering	17
6.3.1	General	17
6.3.2	Sample specifications	18
6.3.3	Technical aspects	18
6.3.4	Sources of uncertainty and challenges	20
6.3.5	Outlook	20
6.4	Ultraviolet-visible spectroscopy	20
6.4.1	General	20
6.4.2	Sample specifications	21
6.4.3	Technical aspects	21
6.4.4	Sources of uncertainty and challenges	22
6.4.5	Outlook	23
7	Particle counting techniques	23
7.1	Particle tracking analysis	23

7.1.1	General	23
7.1.2	Sample specifications	23
7.1.3	Technical aspects	24
7.1.4	Sources of uncertainty and challenges	24
7.1.5	Outlook	25
7.2	Resistive pulse sensing	25
7.2.1	General	25
7.2.2	Sample specifications	26
7.2.3	Technical aspects	27
7.2.4	Sources of uncertainty and challenges	28
7.2.5	Outlook	28
7.3	Single particle inductively coupled plasma mass spectrometry	28
7.3.1	General	28
7.3.2	Sample specifications	29
7.3.3	Technical aspects	29
7.3.4	Sources of uncertainty and challenges	33
7.3.5	Outlook	33
7.4	Condensation particle counter and differential mobility analysing system	34
7.4.1	General	34
7.4.2	Sample specifications	34
7.4.3	Technical aspects	35
7.4.4	Sources of uncertainty and challenges	37
7.4.5	Outlook	38
Annex A (informative) Summary of VAMAS international interlaboratory studies		40
Annex B (informative) General guidance on sample preparation for suspensions containing nanoparticles		43
Bibliography		46
