## Fine bubble technology - Agricultural applications - Part 4: Test method for evaluating the number concentration of ultrafine bubbles (UFB) achieving the promotion of barley seed germination

---

<b>Contents</b>		<b>Page</b>
Foreword .....		iv
Introduction .....		v
1	Scope .....	1
2	Normative references .....	1
3	Terms and definitions .....	1
4	Requirements for UFB water used .....	1
5	Basic characteristics of UFB water relevant to promotion of barley seed germination[1] ....	2
6	Assessment of the adequacy of UFB number concentration[1] .....	3
6.1	General .....	3
6.2	Case 1: UFB1 water results in greater promotion effect than UFB2 water .....	3
6.3	Case 2: UFB1 and UFB2 waters result in similar promotion effect .....	5
6.4	Case 3: UFB1 water results in suppression of germination comparing to UFB2 water .....	7
7	Test report .....	9
Annex A (informative) Example of measured data of UFB's promotion effect on another variety of barley seed (Ichibanboshi) than that of `Yumesakiboshi' .....		10
Annex B (informative) Attributes (storage duration and storage temperature) of seeds that can affect the degree of seed germination .....		11
Bibliography .....		12
