DIN 50929-3:2024-05 (E)

Corrosion of metals - Corrosion likelihood of metallic materials when subject to corrosion from the outside - Part 3: Buried and underwater pipelines and structural components

Contents

Page

Foreword 4

1 Scope 5

2 Normative references 5

3 Terms and definitions 6

4 Materials 7

5 Explanation of the assessment method 7

6 Estimating the likelihood of corrosion of materials in contact with soil 8
6.1 Unalloyed and low-alloy ferrous materials 8
6.1.1 General 8
6.1.2 Free corrosion in the absence of extensive concentration cells 8
6.1.3 Free corrosion in the presence of extensive concentration cells 13
6.1.4 Assessment of the effect of anodic and cathodic regions in the absence of external cathodes 13
6.1.5 Anodic corrosion due to cell formation in the presence of external cathodes 14
6.2 High-alloy stainless steels 15
6.3 Hot-dip galvanized steels 15
6.4 Copper materials 16

7 Estimating the likelihood of corrosion of materials in contact with water 18
7.1 Unalloyed and low-alloy ferrous materials 18
7.1.1 General 18
7.1.2 Free corrosion under water 18
7.1.3 Corrosion at the water/air interface 18
7.1.4 Cell formation in the presence of external cathodes 19
7.2 High-alloy stainless steels 19
7.3 Hot-dip galvanized steels 19
7.4 Copper materials 20

8 Stress-corrosion cracking 20
8.1 Unalloyed and low-alloy ferrous materials 20
8.2 Austenitic Cr-Ni steels 20
8.3 Hot-dip galvanized steels 20
8.4 Copper materials 21

9 Corrosion protective measures 21
9.1 Unalloyed and low-alloy ferrous materials 21
9.1.1 Measures against free corrosion in the presence and in the absence of concentration cells 21
9.1.2 Measures against cell formation in the presence of external cathodes 21
9.1.3 Measures against stray currents 21
9.1.4 Measures against stress corrosion cracking 21
9.2 High-alloy stainless steels 22
9.2.1 Measures against pitting and crevice corrosion 22

9.2.2 Measures against stress corrosion cracking 22
9.3 Hot-dip galvanized steels 22
9.4 Copper materials 22
9.4.1 Measures against free corrosion 22
9.4.2 Measures against stray currents 22
9.4.3 Measures against stress corrosion cracking 22

Bibliography 23

Tables Table 1 -- Guideline values for estimating the mean corrosion rate of unalloyed and low-alloy ferrous materials 8

Table 2 -- Information relating to the rating of soil on the basis of soil samples 10

Table 3 -- Information relating to the rating of soil on the basis of local conditions 12

Table 4 -- Classification of soils, corrosion load and likelihood of free corrosion of unalloyed and low-alloy ferrous materials 13

Table 5 -- Assessment of the anodic and cathodic effect in the presence of aeration cells 14

Table 6 -- Estimating the likelihood of corrosion in the case of cell formation in the presence of external cathodes 15

Table 7 -- Assessing the quality of protective layers on hot-dip galvanized steels 16

Table 8 -- Information relating to the assessment of water 16

Table 9 -- Estimating the likelihood of corrosion of unalloyed and low-alloy steels in water 18
