

ISO 24489:2024-01 (E)

Non-destructive testing - Acoustic emission testing - Detection of corrosion at atmospheric and low-pressure metallic storage tank floors

Contents

	Page
Foreword	iv
Introduction	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 General principles	2
5 Qualification of test personnel	2
6 Test equipment	2
6.1 Acoustic emission testing system	2
6.2 Acoustic emission sensors	3
6.3 Acoustic emission signal cables	3
6.4 Couplant	3
6.5 Preamplifiers	3
6.6 Power signal cables	3
6.7 Filters	4
6.8 Acoustic emission instrument	4
6.9 Maintenance and verification of test equipment	5
7 Actions before testing	5
7.1 General information	5
7.2 Documents	5
7.3 Site inspection	5
7.4 Preparation of test instruction and record sheet	5
7.5 Sensor mounting	5
7.6 Setting of the acoustic emission instrument	6
7.6.1 First steps	6
7.6.2 Simulation of acoustic emission sources	6
7.6.3 Determination of sound velocity	6
7.6.4 Background noise	7
7.6.5 Sensitivity check and threshold	7
8 Performing the test	8
8.1 Storage tank liquid level and condition	8
8.2 Interfering acoustic emission sources	9
8.3 Data acquisition and observations during acoustic emission testing	9
9 Interpretation of test results	9
9.1 General requirements	9
9.2 Data processing	9
9.3 Classification system for the corrosion status and recommendations for maintenance	10
10 Documentation	10
10.1 General	10
10.2 Written test instruction	10
10.3 Test records	11
10.4 Test report	11

Annex A (informative) Classification method based on time-difference location analysis and an example.....	13
Annex B (informative) Classification method based on overall floor condition analysis and an example.....	18
Bibliography.....	23
