## Fine bubble technology - Evaluation method for determining gas content in fine bubble dispersions in water - Part 1: Oxygen content

---

<b>Contents</b>		<b>Page</b>
Foreword .....		iv
Introduction .....		v
1	Scope .....	1
2	Normative references .....	1
3	Terms and definitions .....	1
4	Interferences .....	2
4.1	Iodometric method .....	2
4.2	Electrochemical probe method .....	2
5	Implication of measurement result .....	2
6	Requirement .....	2
6.1	General .....	2
6.2	Correction for the salinity of sample water .....	3
7	Apparatus .....	3
7.1	Optical sensor method .....	3
7.2	Electrochemical probe method .....	3
7.3	Iodometric method .....	3
8	Procedure .....	3
8.1	General .....	3
8.2	Optical sensor method .....	3
8.2.1	General .....	3
8.2.2	Sampling, measuring technique and precautions to be taken .....	4
8.2.3	Calibration .....	4
8.2.4	Determination .....	4
8.3	Electrochemical probe method .....	4
8.3.1	General .....	4
8.3.2	Sampling, measuring technique and precautions to be taken .....	4
8.3.3	Calibration .....	4
8.3.4	Determination .....	4
8.4	Iodometric method .....	4
9	Calculation and expression of results .....	5
9.1	Optical sensor and electrochemical probe methods .....	5
9.2	Iodometric method .....	5
10	Test report .....	5
Annex A (informative) Influence of UFB on the measurement of the oxygen content .....		6
Annex B (informative) Influence of bubble attachment to sensor surface .....		9
Bibliography .....		12
