ISO 4649:2024-08 (E)

Rubber, vulcanized or thermoplastic - Determination of abrasion resistance using a rotating cylindrical drum device

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Termsanddefinitions 1

4 Principle 2

5 Apparatus and materials 4

6 Calibration 5

7 Test pieces 5
7.1 Type and preparation 5
7.2 Number 6
7.3 Time interval between vulcanization or forming and testing 6
7.4 Conditioning 6

8 Test temperature 6

9 Procedure 6
9.1 General test procedure 6
9.2 Comparison against standard reference compounds or user-defined reference compounds 7
9.3 Density 8

10 Expression of results 8
10.1 General 8
10.2 Relative volume loss, Vrel 8
10.3 Abrasion resistance index 8

11 Precision 9

12 Test report 9

Annex A (normative) Suitable abrasive sheet 10

Annex B (normative)Standardanduser-definedreferencecompounds 11

Annex C (normative) Calibration schedule 15

Annex D (informative) Precision and bias 17
