ISO/TS 23878:2024-08 (E)

Nanotechnologies - Positron annihilation lifetime measurement for nanopore evaluation in materials

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Termsanddefinitions 1
3.1 General 1
3.2 Experimental set-up 2

4 Symbols and abbreviated terms 2

5 Principle 3

6 Overview of the positron annihilation lifetime measurement 4

7 Apparatus 7
7.1 Specification of the detector 7
7.2 Discrimination of the detected signals 8
7.3 Measurement conditions 8

8 Preparation of the positron source 9

9 Preparation of the measurement specimen 9

10 Data analysis 9

11 Reporting 10
11.1 Specific values 10
11.2 Pore dimension 11

12 Reference materials 11

Annex A (informative) Interlaboratory comparison 12

Annex B (informative)Configurationoftheapparatus 15

Annex C (informative) List of parameters and measurement conditions 19

Bibliography 21
