Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Termsanddefinitions 1

4 Symbols and abbreviated terms 2

5 Provenance information to be collected or retained 2
5.1 Information record 2
5.2 Verification or generation of sample information and analysis objectives 3

6 Information about sample handling and preparation for analysis to be documented and added to the sample information record 3
6.1 General 3
6.2 Adherence or exceptions to the general sample handling requirements 3
6.3 Description of ex situ sample handling 4
6.4 Method of mounting samples for analysis 4
6.5 In situ sample cleaning or other sample preparation or processing 5
6.6 Post analysis handling and storage 5

Annex A (normative) Information on approaches, issues and good practices regarding sample handling and mounting in preparation for analysis 6

Annex B (normative) Sources of contamination, sample handling and storage practices 18
