

ISO 23505:2025-08 (E)

Petroleum and liquid petroleum products - Calibration of spherical tanks - External electro-optical distance-ranging method

Contents		Page
Foreword		iv
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Principle	2
5	Precautions	2
6	Equipment	2
7	General considerations	3
8	Determination of the number and location of stations	3
9	Determination of the number and position of tangential target points	4
10	Calibration procedure	5
10.1	Instrument set-up	5
10.2	Establishment of the reference target point	5
10.3	Measurement procedure	5
10.4	Measurement of the height of the spherical tank on the vertical centre line	8
11	Other measurements	9
12	Calculation and development of capacity tables	9
12.1	General requirements	9
12.2	Calculation of the inner radius of the spherical tank	10
12.2.1	Spherical radius at tangential target point	10
12.2.2	Spherical radius obtained at the station	10
12.2.3	Outer radius of spherical tank	10
12.2.4	Average wall thickness of spherical tank	10
12.2.5	Inner radius of spherical tank	11
12.2.6	Inner radius of spherical tank at reference temperature	11
12.3	Calculation of the total internal height of the spherical tank on the vertical centre line	11
12.4	Inspection of calibration data	12
12.5	Calculation of the total volume of the spherical tank at reference temperature and working pressure	12
12.6	Calculation of partial volume of spherical tank at reference temperature and working pressure	13
Annex A (informative)	Calibration uncertainties	14
Annex B (informative)	Effect of thermal changes on spherical tank shells	23
Annex C (normative)	Certificate of calibration	24
