

DIN EN 13763-1:2026-04 (E)

Explosives for civil uses - Detonators and detonating cord relays - Part 1: Requirements

Contents		Page
European foreword		3
1	Scope	5
2	Normative references	5
3	Terms and definitions	6
4	Requirements	6
4.1	General	6
4.2	Electric detonators	7
4.2.1	Information to be provided for electric detonators	7
4.2.2	Requirements on properties of electric detonators	8
4.3	Non-electric detonators	10
4.3.1	Information to be provided for non-electric detonators	10
4.3.2	Requirements on properties of non-electric detonators	11
4.4	Electronic detonators	12
4.4.1	Information to be provided for electronic detonators	12
4.4.2	Requirements on properties of electronic detonators	16
4.5	Semi-finished detonators	18
4.5.1	Information to be provided for semi-finished detonators	18
4.5.2	Requirements on properties of semi-finished detonators	19
4.6	Plain detonators	19
4.6.1	Information to be provided for plain detonators	19
4.6.2	Requirements on properties of plain detonators	20
4.7	Surface connectors	20
4.7.1	Information to be provided for surface connectors	20
4.7.2	Requirements on properties of surface connectors	21
4.8	Detonating cord relays	22
4.8.1	Information to be provided for detonating cord relays	22
4.8.2	Requirements on properties of detonating cord relays	23
4.9	Shock tubes	24
4.9.1	Information to be provided for shock tubes	24
4.9.2	Requirements on properties of shock tubes	24
4.10	Electronic initiation systems	25
4.10.1	Information to be provided for electronic initiation systems	25
4.10.2	Requirements on properties of electronic initiation systems	30
Annex A (normative) Specifications on reference detonators		34
Annex B (informative) Classification of defects		37
Annex C (normative) PROBIT model		39
Annex D (informative) Examples of hazards and faults for electronic initiation systems		45
Annex E (informative) Information on evaluation techniques		51
Annex ZA A (informative) Relationship between this European Standard and the essential safety requirements of Directive 2014/28/EU relating to the making available on the market and supervision of explosives for civil uses aimed to be covered		53
