ISO 11933-5:2001-09 (E)

Components for containment enclosures - Part 5: Penetrations for electrical and fluid circuits

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Terms and definitions 1

4 Selecting a component 3
4.1 General requirements 3
4.2 Risk assessment and safety analysis 3
4.3 Other requirements 6

5 Electrical components 6
5.1 Design and installation 6
5.2 Specific component requirements and recommendations 10

6 Fluid components 27
6.1 Design and installation 27
6.2 Special requirements and recommendations 29
6.3 Specific component requirements and recommendations 32
