Hard coal and coke - Mechanical sampling - Part 2: Coal; Sampling from moving streams

Contents		Page
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Establishing a sampling scheme	1
5	Methods of sampling	10
6	Design of mechanical samplers	13
7	Handling and storage of samples	20
8	Sample preparation	21
9	Bias	21
10	Verification	22
Annexes A	Examples of calculations of the number of sub-lots and number of increments per sub-lot (sampling from moving streams)	23
B	Evaluation of sampling equipment for mass-basis sampling	26
C	Guidance on the operation of mechanical samplers	30
	Bibliography	31
