Gas analysis - General quality assurance aspects in the use of calibration gas mixtures - Guidelines

Contents		Page
Foreword		iv
Introduction		ivi
1	Scope	1
2	Terms and definitions	1
3	Gas analysis using a comparison method	4
4	Uncertainty	4
4.1	General	4
4.2	Step-by-step approach	5
4.3	Direct approach	6
5	Traceability	7
5.1	General	7
5.2	Calibration for response function determination	8
5.3	Calibration for bias detection and correction	8
5.4	Verification of individual results	8
5.5	Traceability of reference values	9
6	Validation and verification	9
6.1	Validation of methods	9
6.2	Verification of individual results	10
7	Documentation	10
	Annex A (informative) Examples where traceable standards are available	11
	Annex B (informative) Example where traceable standards are not available	16
	Annex C (informative) Hierarchy of reference gas mixtures	18
	Bibliography	22
