

ISO 12677:2003-05 (E)

Chemical analysis of refractory products by XRF - Fused cast bead method

| Contents | | Page |
|--|--|-------------|
| Foreword | | iv |
| 1 | Scope | 1 |
| 2 | Normative references | 1 |
| 3 | Types of material | 1 |
| 4 | Principle | 2 |
| 5 | Sample grinding | 2 |
| 6 | Apparatus | 3 |
| 7 | Loss on ignition (and/or drying) | 3 |
| 8 | Flux | 4 |
| 9 | Fusion casting procedures | 5 |
| 10 | Calibration | 8 |
| 11 | Corrections | 16 |
| 12 | Reproducibility and repeatability | 19 |
| 13 | Accuracy as measured using certified reference materials | 21 |
| 14 | Definitions of limits of detection | 22 |
| 15 | Test report | 22 |
| Annex A (normative) Calibration range and required detection limits | | 24 |
| Annex B (normative) Corrections for tungsten carbide grinding media | | 28 |
| Annex C (informative) Examples of fluxes/flux ratios | | 30 |
| Annex D (normative) Examples of CRM to be used to check synthetic calibrations | | 32 |
| Annex E (normative) Examples of SeRM | | 37 |
| Annex F (normative) Equation for theoretical calculations | | 42 |
| Annex G (normative) Certified reference materials (CRMs) | | 43 |
| Annex H (normative) Method of interference correction used to compensate for the effects of co-existing components when using SeRM for calibration | | 46 |
| Annex I (informative) Standard deviations achieved with certified reference materials | | 71 |
| Bibliography | | 74 |
