## Metallic coatings - Autocatalytic (electroless) nickel-phosphorus alloy coatings - Specification and test methods

---

<b>Contents</b>		<b>Page</b>
Foreword .....		iv
Introduction .....		v
1	Scope .....	1
2	Normative references .....	1
3	Terms and definitions .....	2
4	Information to be supplied to the producer of the coating .....	3
4.1	Essential information .....	3
4.2	Additional information .....	3
5	Designation of basis metal, metal layers and heat treatment requirements .....	4
5.1	General .....	4
5.2	Designating the basis metal .....	4
5.3	Designation of heat treatment requirements .....	4
5.4	Designating the type and thickness of metal layers .....	5
5.5	Examples of designations .....	5
6	Requirements .....	5
6.1	Special test specimens .....	5
6.2	Appearance .....	5
6.3	Surface finish .....	6
6.4	Thickness .....	6
6.5	Hardness .....	6
6.6	Adhesion .....	6
6.7	Porosity .....	6
6.8	Corrosion resistance .....	6
6.9	Stress relief heat treatment prior to coating .....	7
6.10	Hydrogen embrittlement relief heat treatment after coating .....	7
6.11	Heat treatment to harden the coating .....	7
6.12	Heat treatment to improve adhesion .....	7
6.13	Wear resistance .....	7
6.14	Solderability .....	8
6.15	Chemical composition .....	8
6.16	Peening of metal parts .....	8
6.17	Undercoats and overcoats .....	8
7	Sampling .....	8
Annex A (normative)	Heat treatment to improve adhesion and increase hardness .....	9
Annex B (informative)	Thickness test methods .....	12
Annex C (informative)	Guidance on thickness, composition and use of autocatalytic nickel-phosphorus coatings .....	15
Annex D (normative)	Methods for chemical analysis of autocatalytic nickel coatings for phosphorus content .....	18
Bibliography .....		22
