## Surface chemical analysis - X-ray photoelectron and Auger electron spectrometers - Linearity of intensity scale

---

<b>Contents</b>		<b>Page</b>
Foreword .....		iv
Introduction .....		v
1	Scope .....	1
2	Normative reference .....	1
3	Symbols .....	1
4	Outline of the methods .....	2
5	When to use this International Standard .....	2
6	Procedure for evaluating the intensity linearity .....	2
6.1	The samples .....	2
6.2	Preparing the copper sample .....	3
6.3	Preparing the stainless-steel sample or sample holder .....	3
6.4	Choosing the spectrometer settings for which the intensity linearity measurement is required .....	3
6.5	Operating the instrument .....	3
6.6	Measurement of the intensity scale linearity by varying the source flux .....	4
6.7	Determination of the intensity scale linearity by varying the source flux .....	4
6.8	Measurement of the intensity scale linearity in XPS using the spectrum ratio method for systems with two or more but less than 30 X-ray source emission current settings .....	6
6.9	Determination of the intensity scale linearity in XPS using the spectrum ratio method for systems with two or more but less than 30 X-ray source emission current settings .....	7
6.10	Completing the analysis .....	9
Annex A (informative)	Example results of linearity measurements using the spectrum ratio method (the second method) .....	10
Bibliography .....		13
