ISO 6145-4:2004-06 (E)

Gas analysis - Preparation of calibration gas mixtures using dynamic volumetric methods - Part 4: Continuous syring e injection method

Contents

Page

1 Scope 1

2 Normative references 1

3 Principle 1

4 Application to preparation of gas mixtures 2
4.1 Description of the experimental procedure 2
4.2 Area of validity 3
4.3 Operating conditions 4

5 Expression of results 4
5.1 Volume fraction 4
5.2 Sources of uncertainty 4
5.3 Uncertainty of volume fraction 5

Annex A (informative) Pre-mixed gases for preparation of mixtures of high dilution 6

Annex B (informative) Example of apparatus for preparation of calibration gas mixtures 7

Annex C (informative) Practical hints 9

Annex D (informative) Example of the determination of the uncertainty in the concentration of a calibration gas mixture prepared by the continuous injection method 12
