

DIN EN 14035-25:2006-01 (E)

Fireworks - Part 25: Party Poppers - Specification and test methods

Contents		Page
Foreword		4
1	Scope	6
2	Normative references	7
3	Terms and definitions	7
4	Construction	7
4.1	Shape	7
4.2	Materials of firework case	7
4.3	Integrity	7
4.4	Length of pull-string	8
4.5	Ejected material	8
5	Performance	8
5.1	Pull-string	8
5.2	Principal effects	8
5.3	Number of reports	8
5.4	Sound pressure level	8
5.5	Burning matter	8
5.6	Projected material	8
5.7	Integrity of firework case after functioning	8
6	Primary pack	9
7	Minimum labelling requirements	9
7.1	General	9
7.2	Type name and category	9
7.3	Safety information	9
7.3.1	General	9
7.3.2	Party poppers	9
7.4	Name, address and telephone number of manufacturer or distributor or importer	9
7.5	Reference to this standard	10
7.6	Printing	10
7.6.1	Labelling	10
7.6.2	Type size	10
7.7	Marking of very small party poppers	10
7.7.1	Reduced size	10
7.7.2	Reduced information	10
7.8	Additional information on the primary pack	11
8	Test methods	11
8.1	Length of pull-string (type test and batch test)	11
8.1.1	Apparatus	11
8.1.2	Procedure	11
8.2	Performance (type test and batch test)	11
8.2.1	Test environment	11
8.2.2	Material	11
8.2.3	Apparatus	11
8.2.4	Procedure	13
8.3	Labelling (type test and batch test)	14

Annex A (normative) Type testing	15
Annex B (normative) Batch testing	21
Annex C (Normative) Specification for test paper	24
Annex D (normative) Method for determination of smouldering rate of cigarette	27
Annex E (informative) A-Deviations	28
Bibliography	30
