Surface chemical analysis - Analysis of zinc- and/or aluminium-based metallic coatings by glow-discharge optical-emission spectrometry

Contents		Page
Foreword		iv
1	Scope	1
2	Normative references	1
3	Principle	1
4	Apparatus	2
4.1	Glow discharge optical emission spectrometer	2
4.2	Minimum performance requirements	2
5	Sampling	4
6	Procedure	4
6.1	Selection of spectral lines	4
6.2	Optimizing the glow discharge spectrometer system settings	5
6.3	Calibration	8
6.4	Validation of the calibration	11
6.5	Verification and drift correction	12
6.6	Analysis of test samples	13
7	Expression of results	13
7.1	Quantitative depth profile	13
7.2	Determination of total coating mass per unit area	13
7.3	Determination of average mass fractions	14
8	Precision	14
9	Test report	15
Annex A (normative)	Calculation of calibration constants and quantitative evaluation of depth profiles	16
Annex B (informative)	Suggested spectral lines for determination of given elements	24
Annex C (informative)	Determination of coating mass per unit area	25
Annex D (informative)	Additional information on interlaboratory tests	29
