Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Procedure 2
3.1 Principle 2
3.2 Complementary gas 2
3.3 Electrolytic systems for gas generation 2
3.4 Apparatus 3
3.4.1 Cell construction 3
3.4.2 Current supply and gas flow control 3
3.5 Gas mixture preparation 3
3.5.1 Complementary gas 3
3.5.2 Voltage supply 3
3.5.3 Calculation of gas mixture content 4

4 Uncertainty evaluation 6
4.1 Introduction 6
4.2 Sources of uncertainty 6
4.2.1 Complementary gas flow 6
4.2.2 Gas generation 6
4.2.3 Absorption of generated gas in the cell electrolyte 6
4.2.4 Effect of moisture content 6
4.2.5 Effect of temperature 6
4.2.6 Purity of electrolytic chemicals 6
4.2.7 Impurities in complementary gas 7
4.3 Uncertainty of volume fraction 7

5 Electrochemical cell design 7

Annex A (informative) Example of a commercial electrochemical cell 9

Annex B (informative) Schematics of electrolytic cells used for gas generation 11

Annex C (informative) Schematic of electrical supply to gas generation cell 12

Annex D (informative) Decomposition voltages of solutions between smooth platinum electrodes 13
