ISO/TR 18392:2005-12 (E)

Surface chemical analysis - X-ray photoelectron spectroscopy - Procedures for determining backgrounds

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Terms and definitions 1

3 Symbols and abbreviated terms 1

4 Types of background in XPS 1

5 Removal of X-ray satellites from electron spectra 2

6 Estimation and removal of inelastic electron scattering from electron spectra 2
6.1 General Information 2
6.2 Procedures to account for inelastic electron scattering 2
6.2.1 Introduction 2
6.2.2 Estimation of the linear background and its removal 3
6.2.3 Integral background removal 3
6.2.4 Removal based on the electron inelastic-scattering cross-section 4
6.3 Procedures accounting for both inelastic and elastic scattering 5
6.4 Less commonly used procedures 5
6.5 Role of surface and core-hole effects in background determination 6
6.6 Determining the background for inhomogeneous materials 6

7 Comparisons of procedures for removing effects of inelastic electron scattering from electron spectra 7

Bibliography 8
