

DIN EN 15112:2006-10 (E)

External cathodic protection of well casings

Contents		Page
Foreword		3
Introduction		4
1	Scope	5
2	Normative references	5
3	Terms and definitions	5
4	Description and assessment of corrosion risks	9
4.1	General	9
4.2	Description of corrosion risks	9
4.3	Corrosion risk assessment	9
5	Prerequisites for application of cathodic protection	10
5.1	General	10
5.2	Electrical continuity	10
5.3	Electrical isolation	10
5.4	Cathodic protection equipment	11
5.5	Groundbed	11
5.6	Safety requirements	11
6	Design of the cathodic protection	12
6.1	General	12
6.2	Voltage drop profile method	12
6.3	Polarisation curve method	13
6.4	Mathematical approach based on a field test	13
6.5	Simulation of the cathodic protection for a well	13
7	Measurement of the well-casing-to-soil potential at the wellhead	14
7.1	General	14
7.2	Measuring points	14
7.3	Method used for potential measurement - Interpretation	15
8	Additional cathodic protection equipment	15
Annex A (normative) Voltage drop profile		16
Annex B (informative) Polarisation curve method applied to a well		23
Annex C (informative) Determination by calculation of the potential shift at the bottom of the well and the well to soil resistance		26
Bibliography		36
